GOOD COMBINATOR / DISTRICTOPS / COMMISSIONER PILOT

Commissioner AI Lab

A practical field kit for efficiency, transparency and evidence-based oversight.

Created Nov. 8, 2026 | Owner: Doug Liles | Built on the Nov. 7 plugin candidates

LIVE ADDRESS AND COMPLETED WORK

fl5ai.com/commissioners - linked from the homepage with a three-step "Try it now" callout.

Published two demonstrations, three portable prompts with fictional records, source references, a cash-limit calculator, QR handout, presenter guide, pilot checklist and offline kit. Three-agent review checked examples, arithmetic boundaries and links; navigation and print-prompt logic were improved.

TRY ONE TASK IN YOUR OWN ACCOUNT

Open the field kit. Choose board preparation, equipment comparison or project spending. Copy a complete prompt with fictional records into your own approved ChatGPT account. Check the sources and numbers before using any result.

ONTOLOGY / HOW THE PIECES CONNECT

PROJECT	→	WORKFLOW	→	EVIDENCE	→	REVIEW	→	ACTION
Commissioner Lab		Choose a task		Records + sources		Check + correct		People decide

Capabilities: Board Packet Briefing | Crossroads | District Ops
Mosquito Intelligence | Meeting Rules Practice

Start: choose a task → copy prompt + sample → use your own eligible account.
Check: verify sources + calculations → record corrections → measure net time saved.

NEXT STEPS AND NEXT TIGHT PILOT

Start small with one workflow and a named staff owner. Recommended next pilot: turn one approved meeting's action items into staff-verified owners and dates, then check closure over 30 days. Compare total time, including review and corrections, with the existing process.

TOP TEN NEXT-PILOT MENU - PROPOSED; REUSE THE EXISTING CAPABILITIES

1. Meeting-action follow-through
2. Board-packet revision alerts
3. Budget variance questions
4. Contract / invoice reconciliation
5. Equipment / service comparisons
6. Surveillance oversight brief
7. Resident-question reply drafts
8. Agenda and missing-exhibit check
9. Policy / deadline reminder checklist
10. Meeting-rules practice drills

CONSIDERATIONS AND READINESS

Demonstrations are scripted and synthetic; the calculator is deterministic. The site makes no AI model calls. Your account's features and limits apply; API billing is separate. Plugin installation, physical-device/voice testing and relevant expert reviews remain unverified. Staff check facts; people approve decisions.
